Re: Lawrence Hydroelectric Project (FERC No. 2800-054)
Filing of Draft License Application

Dear Secretary Reese:

Essex Company, LLC (Essex) is the Licensee, owner, and operator of the Lawrence Hydroelectric Project (FERC No. 2800) (Project or Lawrence Project). The Lawrence Project is located on the Merrimack River in the City of Lawrence in Essex County, Massachusetts. The Project was licensed by the Federal Energy Regulatory Commission (FERC or Commission) on December 4, 1978 (with an effective date of December 1, 1978), and the license expires on November 30, 2028. Accordingly, Essex is pursuing a new license for the Project pursuant to the Commission's Integrated Licensing Process (ILP), as described at 18 Code of Federal Regulations (CFR) Part 5 of the Commission's regulations. In accordance with 18 CFR § 5.16(a), Essex is filing herewith the Draft License Application (DLA) for the Lawrence Project.

The DLA is composed of two volumes, as described below. Exhibit E – Environmental Report contains Licensee's analysis of the effects of the Proposed Action, relicensing the continued operation and maintenance of the Project. Based upon the analysis of the effects of the Proposed Action on developmental and non-developmental resources, the Licensee is proposing certain environmental measures consistent with the Project's current license as discussed in detail in Exhibit E. As stated in this DLA, proposes to remove the North and South canals and from the new FERC license. Further details of Essex's proposal are provided in this license application.

The DLA consists of the following:

VOLUME I OF II (Public)

- Executive Summary
- Initial Statement and Additional Information Required by 18 CFR §5.18(a)
- Exhibit A – Project Description
- Exhibit B – Project Operation and Resource Utilization
- Exhibit C – Construction History
- Exhibit D – Cost and Financing
- Exhibit F – General Design Drawings
- Exhibit G – Project Maps

- Exhibit H – Ability to Operate

VOLUME II OF II (Public)

- Exhibit E – Environmental Report

Please note that Essex is not submitting the portions of the application that constitute Critical Energy Infrastructure Information (CEII), including the Exhibit F drawings and the Supporting Design Report (SDR), with this filing. Certain information within the DLA is still under development or more appropriately filed with the Final License Application (FLA) in November 2026. Additionally, proposals presented in the DLA are preliminary.

Essex is making the DLA available to resource agencies, Indian tribes, local governments, non-governmental organizations, and members of the public on the Project's distribution list. Electronic copies of the DLA will be available on the Project's public relicensing website at <https://lawrencerelicensing.com/> or via FERC's online e-Library system at <http://www.ferc.gov/docs-filing/ellibrary.asp>, by searching Docket Number P-2800.

In accordance with 18 CFR § 5.16(e), interested parties may file comments regarding the DLA within 90 days of the date of this letter (i.e., by October 5, 2026). All comments must be e-filed or sent to FERC at the following address:

Hon. Debbie-Anne A. Reese, Secretary
Federal Energy Regulatory Commission
888 First Street. NE
Washington, D.C. 20426

If there are any questions regarding the DLA, please do not hesitate to contact Kevin Webb at (978) 935-6039 or at kwebb@patriothydro.com.

Sincerely,

Essex Company, LLC

Kevin Webb
Hydro Licensing Manager
